Re: Lakeview Rock Products, Lakeview Quarry M/035/020

Mr. Hedberg,

As per your request for information we submit the following:

- *Reclamation Plan* - We currently have a reclamation plan on file with Salt Lake City. We participated with the development of the "Beck Street Reclamation Framework and Foothill Area Plan". Our Plan that is on file with Salt Lake City incorporates the elements of the area plan. The key item as it pertains to the Lakeview pit is the grading plan showing the benches and the finish floor elevation. I have included a copy of our current grading plan.
We have worked over the last few years to start to establish the upper or East excavation limits and start the benches and slopes. Our anticipated 5 year plan would be to continue much as we have. It would not be anticipated that any areas would be ready for reclamation in that time.
- *Reclamation Surety* - We have deposited \$44,064 with Salt Lake City to be placed in a reclamation escrow account. This money is in an interest bearing account, and can be withdrawn to cover approved reclamation costs as they occur. I have attached copies of the "Trust Fund Agreement", and copies of the checks.
- *Current Topographic Map* - We have the area flown on a yearly basis and that map is submitted to Salt Lake City. We have included the map from April 2002.
- *Associated Permits* - We have included a copy of our DAQ approval order.

RECEIVED
